

# Jabiru Geneebeinga Wetlands

The Jabiru Geneebeinga Wetlands are a natural habitat area that provides a sanctuary for native birds and other wildlife. Situated adjacent to the Casino Golf Club along Queensland Road, Casino, the wetlands are a short drive from the CBD, providing public facilities for recreational and educational pursuits.

At the entrance, a picnic area is provided, along with observation points and maintained walkways, ensuring visual access to the wildlife whilst keeping disturbance to a minimum.

The Jabiru Geneebeinga Wetlands also incorporates the mini railway tour, which conducts train rides every Sunday through the wetlands and to the old Casino Station Museum, an important historical facet of Casino's past, when the town served as a major railhead.

## WALKING GUIDE

Proceed into the wetlands through the walkway entrance on your left. Walk straight ahead and cross the bridge. There is an observation point on the left where wildlife and their habitat can be observed over the central pond. Another observation point is located below this site closer to the water's edge.

Retrace your steps back over the bridge and turn right to see around the east side of the wetlands. While crossing the bridge observe the wildlife and vegetation (especially the waterlilies).

Further on discover Pelicans, ducks and other water birds over on the wetlands. A seating area is located here, where the central pond can be viewed from the east side. Continue around the central pond, passing a seating area.

At this point a fork appears in the walkway, turn left towards the golf course and walk around the third pond. Observe on the wetlands side to the east, birds such as water hens, ducks and spoonbills. Walking further around the pond brings you to the end of this path.

Retreat back to the fork in the road and continue on the left, passing by a seating area. Walk between the two ponds, seeing the delights of yellow, white and blue water lilies.

Head towards the central pond and cross over a bridge on the left. From here go up to the observation point (the highest in the wetland to see the expansive wetland views).

Walk down from the observation point and proceed through the mound area or along the pond. Turn left across the train tracks and over the yellow bridge and back to the picnic area.
